

The centre console came from Ricambio, the Stereo from Van der Laan, it's a Caliber RCD 110 that has everything but in an old style unit. I had to modified the parcel glove box to make room for the console.

The speakers are Kenwood 110w (4" Dia), and I installed all the wiring prior to the interior work. The speakers are mounted on a shelf unit in black vinyl with red accents and FIAT badge, that came from Van Der Laan too, it's purpose made to fit and has cut outs for the speakers which have to be shallow in depth so they clear the actual rear shelf.

Hope this helps
