RADIATOR (VERSION WITH AIR CONDITIONING)

Construction

RADIATOR (VERSION WITH HEATER)	
RADIATOR (VERSION WITH AIR CONDITIONING)	
WATER PUMP AND THERMOSTAT	
WATER PUMP	
THERMOSTAT	

This consists of a radiating mass and two side chambers, one top and one bottom, for circulation of the coolant. The coolant inlet and outlet pipes are connected to the top reservoir, in order to convey the fluid along a U-shaped route in the radiating mass.

The tubes and fins of the radiating mass and the reservoirs are of metal.
