retaining all type of objects of all
different sizes.
Part No. 50901433

Now it's yours, it's important to protect it.

Using the latest technology the MetaSystem GPA800 offers a combined vehicle locating and alarm system.

MetaSat Vehicle Locater

The MetaSystem GPA800 is an interactive, self-management GSM and GPS location system compatible with factory-fitted and aftermarket alarm systems. The system sends geographical co-ordinates via the GSM network to a designated mobile phone along with an explanation of the alarm trigger. The longitudinal/latitudinal co-ordinates can then be input into the MetaSAT website which show the location of the vehicle on street level maps.

owner can obtain the status of the security system, the car's speed or location and effect remote immobilisation. The car can also be 'blocked' remotely by a simple text message meaning the car cannot be driven if the car keys are stolen.

The level of self management, lack of contractual fees and versatility of the system make it an excellent choice for fleet managers and private motorists.
Part No. 46002843

The MetaSAT GPA800 can be programmed to warn about certain conditions, such as low battery voltage or if a pre-set speed limit is exceeded. By inputting a series of codes, the

Key Features

- No contractual service costs unlike competitors' products*
- Operates automatically and independently – driver or fleet manager is in control
 - Thatcham Q Class Approval**
- Covert communication with the driver
- Interaction with the engine via text message to immobilise or 'block' the vehicle
 - Periodic status report

Optional Extras

- Microphone and speaker – allows two way communication
Part No. 46002845
- In-car, hands free kit – new legislation makes this a 'must have'
Part No. 50901459
- Crash sensor – automatically issues message to designated number in the event of an accident
Part No. 46002847

*A Sim card is required. Compatible with all Air time providers

**Thatcham Q class number EVQ1090
